Art Unit: 2653

The amendment dated 11/11/04 has been considered with the following results

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11, 12, 14-19 and 29-38, drawn to method/device for generating a multi-dimensional data particularly related to data manipulation, classified in class 369, subclass 59.1.
 - II. Claims 39-70, drawn to method/ system for accessing data or generating data from a plurality of data storage surfaces of media, classified in class 369, subclass 94.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as without data manipulation or with a plurality of data storage surfaces of media a. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
